## Equity-based Price Grid

latest update **Jan-2026**  
valid until: **Mar-2026**

### What it is?

This is an equity-based pricing model. It's designed to make my work accessible to people and organizations with different financial realities, while allowing me to sustain my practice as a self-employed professional.

### How it works?

The grid has several revenue levels.

You self select which one applies to your situation (trust-based).

Each level has an hourly rate, and event / full day tarifs.

Discounts are available if you book several items in advance as a package.

All of my services are priced using this same grid.
